Objective

Authenticate a suspicious email by examining message headers, sender identity, mail routing path, SPF, DKIM, DMARC, embedded URLs, and overall phishing indicators.

Evidence preservation

I received this file on Aug 13, 2026, at 5:32 PM GMT.

Exported the **eml** from Gmail.

Verified the hashes that came associated with the file.

Evidence file: blocked_email.eml

SHA256: 021bedb7c722674260f54ddd5f3d05306c5f4ce035d9df4913dee52018bd5416

MD5: 72c1199ffa543d8995f03439ad571fed

```
Command Prompt
C:\>certutil -hashfile "C:\Users\CyberSamurai\Downloads\blocked account.eml" SHA256
SHA256 hash of C:\Users\CyberSamurai\Downloads\blocked account.eml:
021bedb7c722674260f54ddd5f3d05306c5f4ce035d9df4913dee52018bd5416
CertUtil: -hashfile command completed successfully.

C:\>certutil -hashfile "C:\Users\CyberSamurai\Downloads\blocked account.eml" MD5
MD5 hash of C:\Users\CyberSamurai\Downloads\blocked account.eml:
72c1199ffa543d8995f03439ad571fed
CertUtil: -hashfile command completed successfully.

C:\>|
```

Identify the claimed sender

The next step was to locate the visible sender fields.

From header

From: "GmailSupportTeam" <twsupportvtg@xgsesqbyqzbydblvkhnodfqh.com>

Return-Path

Return-Path: <abuse@monitoring-reporting.overview.commerce.gov.accordinant.com>

Reply-To

Reply-To: <reply@iwzu1.c7gbvvg.uic.edu>

Initial assessment

The message claims to be a Gmail support notice, but the **From domain**, **Return-Path domain** and **Reply-To domain** do not match. Legitimate Gmail notices normally use **google.com** addresses and aligned sender domains.

Interpretation

The message entered Gmail from **66.165.231.172**. The reverse name is gerhold.dividnovic.com. This host is not a Google mail server.

Finding: The email originated from a third-party server, not Gmail infrastructure.

SPF Check

Located the SPF results and **Received-SPF** was assigned pass.

Under Authentication-Results

spf=pass ... smtp.mailfrom=abuse@monitoring-reporting.overview.commerce.gov.accordion.com

What SPF proves

SPF only proves that **66.165.231.172** was authorized to send mail for the **Return-Path domain**.

```

Important limitation

SPF does **not** prove the visible **From** address is genuine.

- SPF checked: monitoring-reporting.overview.commerce.gov.accordinant.com
- Visible From: xgsesqbyqzbydblvkhnodfqh.com

Finding: SPF passed for a different domain than the visible sender.

DKIM Check

I Locate the signature.

DKIM-Signature: d=xgsesqbyqzbydblvkhnodfqh.com; s=default;

Authentication result: **dkim=permerror (no key for signature)**

Interpretation

The message contains a DKIM signature but no valid key was found.

Findings

No DMARC result is present in the header. Also, neither SPF nor DKIM alignment succeeded.

DMARC authentication failed.

Evaluate header consistency

Subject

Subject: We've blocked your account! Your photos and videos will be deleted...

Content observations

Threat of account deletion.

Urgent action request.

Security scare language.

Secure Your Device.

Correlate all domains

Purpose	Domain
Visible sender	xgsesqbyqzbydblvkhnodfqh.com
Envelope sender	monitoring-reporting.overview.commerce.gov.accordinant.com
Reply-To	uic.edu
Sending host	dividnovic.com
Link host	storage.googleapis.com

Legitimate transactional email rarely uses five unrelated domains in a single message.

Finding: Multi-domain mismatch strongly indicates spoofing or phishing.

Timeline validation

Event	Timestamp
-------	-----------

Message created	Fri, 31 Jul 2026 05:40:38 -0400
-----------------	---------------------------------

Received by Gmail	Fri, 31 Jul 2026 02:42:08 -0700
-------------------	---------------------------------

These times represent the same moment in UTC and are internally consistent.

Finding: No timestamp anomaly detected.

Forensic Conclusion

Authentication summary

Control	Result	Interpretation
SPF	Pass	Authorized for envelope domain only
DKIM	Fail (permerror)	Signature invalid / no key
DMARC	Fail	No aligned SPF or DKIM
From alignment	Fail	Different domain
Reply-To consistency	Fail	Different domain
Sending infrastructure	Fail	Non-Google host

URL analysis	Fail	HTTP cloud-storage phishing link
--------------	------	----------------------------------

The message cannot be authenticated as a legitimate Gmail communication. The visible sender identity is not supported by SPF, DKIM failed, and DMARC alignment failed. Combined with the phishing content and deceptive links, the email should be classified as PHISHING / MALICIOUS EMAIL.

Analyst Statement

Based solely on the supplied header and body content, I conclude that the message is a phishing email impersonating a Gmail security notice. The sender identity is not authenticated, domain alignment fails, and the embedded links present a significant risk to the recipient.
